Education

Bachelor's, Software Engineering, GPA: 3.93
Brigham Young University–Idaho

Currently Enrolled - July 2025
Rexburg, Idaho USA

- Built a full-stack data-driven car dealer website using the MVC pattern, Node.js, HTML and CSS, and JavaScript
- Developed a Spotify Metrics Dashboard, using Python, HTML, and CSS to analyze, and display user listening habits
- Added automation tests to a production pipeline using Postman
- Was a Project Manager for a class, applying SCRUM methodologies to organize sprints and deliverables
- Increased code quality through code reviews
- Designed and implemented algorithms with Python, Java, JavaScript, TypeScript, and C++
- Integrated the ArcGIS API in conjunction with JavaScript to create an Isochrone Map website
- Employed Figma to prototype an app in order to collect user requirements for a Senior Project

Associate's, General Technology (Honors)
Weber State University

Aug. 2020
Ogden, Utah USA

- Used Object Oriented Practices such as inheritance and scope management
- Coded programs using custom data structures and recursion
- Completed team projects through collaboration
- Enhanced writing composition through comparison, perspective, and persuasion

Certificate, Software Development
Ogden-Weber Technical College

Aug. 2018
Ogden, Utah USA

- Wrote software user documentation
- Used introductory understanding of Git version control to host and update projects
- Built scripts for checking user access rights for a set of folders

Experience

Technology Support Specialist
Weber School District

Apr. 2019 – July 2023
Ogden, Utah USA

- Coordinated deployment of 300+ devices in a time-restrictive window of one day
- Troubleshot hardware and software issues on desktops, Chromebooks, printers, projectors, and other peripherals
- Communicated needs and concerns of dozens of end users to policymakers by collecting and consolidating feedback

Data Analyst
Goldenwest Credit Union

Sep. 2017 – Apr. 2019
Ogden, Utah USA

- Initialized branch manager key indicators report system using SQL subqueries, joins, unions, and aggregate functions
- Implemented data storage and processing automation with Visual Basic
- Compiled raw data from hundreds of text files to be easily viewed for promotions and marketing campaigns
